

Crosswalk Analysis Note Catcher Activity

Directions:

1. Read through your grade level crosswalk comparing the Next Generation Mathematics Learning Standard with the Common Core Standard.
2. Use the note catcher to record the **type** of change that occurred for each Next Generation Standard.
Reminder: There may be more than one type of change for a standard, therefore, a standard may be recorded in more than one box.
3. When finished use the back of the note catcher to answer the two questions on the bottom of the page.
4. Have a discussion about the majority of the changes happening in your grade level, and discuss if there is any pre-planning that needs to occur during the transition period.
